

Ali Reza Rezayee

Lead Full-Stack Software Engineer

Islamabad, Pakistan | aliraza.r10@gmail.com | www.imali.dev | LinkedIn: alireza-r10

Professional Summary

Lead Full-Stack Software Engineer with **9+ years** of experience building and scaling production applications across FinTech, EdTech, and data-driven products. Experienced in leading development teams and delivering complex web applications using **Next.js, React, TypeScript, Node.js, Python, and PostgreSQL**. Strong background in application architecture, financial data integrations, personalized recommendation and insight systems, AI/ML service integration, and performance optimization. Proven ability to translate complex business and product requirements into scalable, maintainable, and user-focused software while contributing across the full product lifecycle.

Technical Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL

Frontend: React, Next.js, React Native, Tailwind CSS, Bootstrap

Backend: Node.js, Strapi, Django, Django REST Framework, Laravel, Flask

Databases: PostgreSQL, MySQL, MS SQL Server

AI & Data: OpenAI, RAG, Qdrant, faster-whisper, Tableau, Octoparse, BeautifulSoup

Cloud & Tools: Git, Docker, Webhooks, OAuth, Vercel

Integrations: Plaid, Qvestrate, Stripe, Financial Data APIs

Professional Experience

Lead Software Engineer | FundEvolve Inc. | Ontario, Canada (Remote) | Nov 2022 – Present

- Lead full-stack development of the core FundEvolve application, a personalized financial wellness platform combining financial data, budgeting, financial planning, AI-powered insights, advisor collaboration, messaging, and notifications.
- Develop and maintain complex financial workflows covering **budgeting, cash flow, net worth, assets, liabilities, investments, and goals**, translating financial requirements into scalable and intuitive product experiences.
- Contribute to **Financial Path, Momentum Score, and personalized recommendation** experiences, integrating financial calculations, user-specific financial signals, priorities, and projected scenarios into the application.
- Build advisor-facing workflows that enable financial advisors to review client **cash flow, investments, net worth, assets, and liabilities**, supporting collaboration between users and advisors.
- Contribute to AI-powered personalization systems that combine deterministic financial rules and user financial data with LLM-generated contextual insights and recommendations; also contributed to specialized Django/Python AI services, including financial content analysis and personalization.
- Integrate and maintain financial data workflows with **Plaid, Qvestrate and Stripe**, supporting account linking, transactions, investments, assets, liabilities, and financial calculations; also contribute to in-app messaging, push notifications, and email notification workflows.
- Improved application **performance by 60%+** through architectural restructuring, logic optimization, technical-debt reduction, dependency auditing, and development of lightweight custom alternatives; lead and mentor developers, troubleshoot complex blockers, review implementations, and contribute to architectural decisions.

Technologies: Next.js, React, TypeScript, Node.js, Strapi, PostgreSQL, Tailwind CSS, Django, Python, REST APIs, Plaid, Qvestrate, OpenAI, Docker

Co-Founder & COO | Lead Engineer | BAMAA | YAR Learning Platform | 2025 – Present

- Co-founded and lead engineering for YAR, an AI-assisted learning platform designed around the educational needs of Afghan students, with personalized practice, mastery tracking, progress insights, and Kankor preparation.
- Design and develop the core web application using **Next.js, React, TypeScript, Tailwind CSS, React Query, and Supabase**, covering onboarding, subjects, topics, practice, exams, public assessments, Kankor simulations, and learning progress.

- Build the application-side integration layer for AI/ML services, connecting the platform to **Python/FastAPI and Lambda-based services through REST APIs**, including authentication, request/response handling, validation, error handling, and service integration.
- Build AI-assisted learning workflows including **handwritten-solution image/OCR extraction, AI-driven mistake analysis, question explanation generation, and mastery-based question recommendations**, integrating these capabilities into practice and exam flows.
- Implement and integrate student **mastery and recommendation workflows**, using mastery data and probabilistic learning models to personalize question selection and learning progression.
- Lead product and technical decisions across the platform, translating educational requirements into scalable application architecture while coordinating development and prioritizing features.
- Develop a localized learning experience aligned with **Afghan curriculum structures**, including Dari/Persian localization and structured subjects, topics, and subtopics.

Technologies: Next.js, React, TypeScript, Tailwind CSS, React Query, Supabase, REST APIs, Python/FastAPI ML Services, Lambda

Data Analyst | Mustafa Group — Kabul, Afghanistan | Apr 2021 – Sept 2021

- Scraped, cleaned, analyzed, and visualized business data using **Python, Tableau, and Octoparse** to support reporting and decision-making.
- Built and maintained structured databases and data workflows for insights and reporting.
- Developed and customized an e-commerce platform using WordPress, including CMS functionality and performance improvements.

Technologies: Python, Tableau, Octoparse, WordPress, MySQL

Web Developer | Reliance Power Group | Kabul, Afghanistan Jun 2021 – Oct 2021

- Developed an internal management information system using Flask, MySQL, JavaScript, and Bootstrap, focusing on data integrity, maintainability, and scalability.
- Gathered client requirements, participated in testing and debugging, and supported team members throughout development and delivery.

Technologies: Python, Flask, JavaScript, MySQL, Bootstrap, GitHub

Web Developer | Kateb University | Kabul, Afghanistan | Jul 2016 – Nov 2019

- Led development and maintenance of university management systems and websites using PHP, Laravel, JavaScript, and MySQL.
- Translated UI designs and business requirements into responsive web applications, managed deployments, and supervised junior developers through task allocation, testing, debugging, and documentation.

Technologies: PHP, Laravel, JavaScript, Bootstrap, MySQL, GitHub

Volunteer Experience

Co-organizer / Lead Web Developer | ICPC Kabul Asia Regional & National Contests | 2017 – 2019

- Managed technical infrastructure and official websites for multiple programming competitions and related events.
- Coordinated IT logistics and supported programming training and ACM/ICPC bootcamp sessions for aspiring software engineers.

Education

Bachelor of Science in Computer Science Kateb University | Kabul, Afghanistan | 2013 – 2016

Languages

Dari: Native

English: Professional Working Proficiency

Urdu/Hindi: Advanced

Pashto: Intermediate
